

Section 1 Chemical Product and Company Identification

Product Identifier	Yellowboard
General Use	Makeready material for pouring counters and foil stamping
Company	Infinity Foils, Inc. – A UEI Group Company
Address:	14614 W. 106th Street Lenexa, KS 66215
Phone	+1 913 888 7340 or +1 877 932 3645 (US Only)
Emergency Contact Number	CHEMTEL – Available 24 hours/day, 7 days/week Domestic North America: +1 800 255 3924 International: +1 813 248 0585

Section 2 Hazards Identification

During normal operation and usage, this solid material article does not present inhalation, ingestion, or chemical hazards.

When this article is machined or otherwise modified by the user, chips containing filaments and fine or tacky dusts may be created in quantities substantial enough to affect the functionality of machines and equipment and may be potentially hazardous if the exposure limits described in Section 8 are exceeded.

Section 3 Hazardous Ingredients / Identity Information

Where present, listed constituents exist as a solid.

May Contain the Following

Hazardous Components	CAS No.	%
Sulphite and sulphate pulp (Cellulose)	9004-34-6	< 100%
Paper additives		< 1%
Fillers		< 1%
Colorants (free of heavy metals)		< 1%

Section 4 First Aid Measures

Inhalation	If breathing has stopped, perform artificial respiration and obtain medical aid immediately. If persistent irritation, severe coughing, or breathing is difficult, provide fresh air and seek medical attention as soon as possible.
Ingestion	If the product or dust is swallowed, seek immediate medical attention or advice. Do not induce vomiting.
Eye Contact	Eye injuries from solid particles should receive immediate medical attention. Dust may be flushed from eyes immediately with large amounts of water, lifting the lower and upper lids occasionally. Seek medical attention.
Skin Contact	Cuts or abrasions should be treated promptly with thorough cleansing of the affected area. Wash the skin using soap or mild detergent and water. Get medical attention if irritation or dermatitis develops and persists.

Section 5 Firefighting Measures

Flammable/Combustible Properties	Carbon dioxide, carbon monoxide, and other hazardous gases and volatiles may be generated.
Flammability Classification	
OSHA/NFPA	Class: Solid
Extinguishing Media	Same as for a wood fire (water, carbon dioxide, dry chemical, foam or sand).
Unusual Fire and Explosions Hazards	Isolate fire area and deny unnecessary entry. Fire fighters should wear positive-pressure self-contained breathing apparatus (SCBA) and protective clothing. Dust from machining and fabrication operations may be explosive if mixed with air in critical proportions in the presence of an ignition source. Heat from fire can generate decomposition products that may cause a health hazard.

Section 6 Accidental Release Measures

Personal Precautions	Product in solid form may be picked up by hand or other means to be placed into a container.
Environmental Precautions	Should waste disposal be deemed necessary, follow Federal, State, or Local regulations.
Methods for Cleaning Up	Do not use compressed air for cleaning.

Section 7 Handling and Storage

Store material in a clean, cool, ventilated area away from all sources of ignition. Dust generated during normal manufacturing operations can represent both a health hazard and a fire hazard. Use dust control equipment at the point of generation in machining and sawing operations. Wash hands and other exposed areas thoroughly after handling and wash soiled clothing before reuse.

Section 8 Component Exposure Limits

Appropriate Engineering Controls	When machining, use adequate local (preferably) or general exhaust ventilation to ensure that concentrations of dusts or fumes do not exceed exposure limits. Keep workplace clean and dry. Train personnel to minimize exposure to hazards during installation and replacement of product. On a regular basis, verify condition and proper function of equipment in which the product will be installed.
Personal Respiratory Protection	Use an approved respirator, with the proper assigned protection factor, whenever airborne concentrations of hazardous components exceed listed exposure limits.
Personal Hand Protection	Use appropriate gloves for periods of longer exposure or to protect against physical hazards.
Eye Protection	Always wear safety glasses with side shields and appropriate hearing protection when grinding or cutting.
Skin Protection	For brief contact with dust, no precautions other than clean clothing are usually required.

Hazardous Components	CAS No.	OSHA (PEL/TWA)	ACGIH TLV TWA
Cellulose	9004-34-6	15 mg/m ³ (Respirable Dust)	10 mg/m ³ (Respirable Dust)

Section 9 Physical and Chemical Properties

Appearance/Odor	Yellow/odorless	Odor Threshold	No data
pH	No data	Boiling Point	No data
Melting Point	6.5-8.5 (1 00g/L water)	Solubility (H₂O)	20deg C <1.0%
Specific Gravity	1.7 gm/cc	Density	0.600 g/cm ³
Octanol/H₂O Coefficient	No data	Evaporation Rate	Not volatile
Molecular Weight	No data	Decomposition Temperature	No data
Auto Ignition	No data	Lower Flammability Limit	No data
Flash Point	>240deg C	Upper Flammability Limit	No data
Vapor Density	No data	Vapor Pressure	No data
VOC	No data	Flammability Class	No data
Viscosity	No data		

Section 10 Chemical Stability and Reactivity

Stability	Stable under normal handling conditions
Conditions to Avoid	Protect from heat, sparks, flame and possible sources of ignition
Incompatibility	Avoid contact with strong acids and bases
Hazardous Decomposition/ By-Products	Carbon dioxide, carbon monoxide, bromine and other hazardous gases. These gases and other volatiles may be generated under normal processing conditions.
Hazardous Polymerization	Will not occur

Section 11 Toxicological Information

**Possible effects
by routes of exposure**

Inhalation	Dust may cause nasal dryness, irritation, coughing, sneezing and sinusitis due to the mechanical reaction to the fibers. For most individuals, the irritation generally does not persist and the effect will subside after the worker is removed from the exposure. Repeated exposures (even below 5 mg/m ³) to certain dusts can produce allergic responses in some sensitive individuals.
Eye Contact	Dust may cause temporary mechanical irritation or a burning sensation to the eyes.
Skin Contact	Dust may evoke allergic contact dermatitis in sensitized individuals.
Ingestion	Ingestion of significant amounts of product is unlikely. If swallowed and person is conscious, give large quantities of water to drink. Get medical attention as soon as possible. Serious effects may occur if large amounts of dust are swallowed.

Acute Toxicity

Component	Oral LD ₅₀ (rat)	Dermal LD ₅₀ (rabbit)	Inhalation LC ₅₀ 4 hr (rat)
Cellulose	>5000 mg/kg	>2000 mg/kg	No data available

Section 12 Ecological Information

Ecotoxicity	Not biodegradable. This product is not expected to present an environmental hazard. Avoid releasing dusts and fumes into the environment.
Persistence/Degradability	No Data
Bioaccumulative Potential	No Data
Mobility in Soil	No Data

Section 13 Disposal Considerations

Disposal Instructions	Dispose in accordance with federal, state, provincial, and local regulations. Regulations may also apply to empty containers. The responsibility for proper waste disposal lies with the owner of the waste.
------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Section 14 Transportation Information

The material is not regulated under DOT provisions.

Section 15 Regulatory Information

U.S. TSCA Inventory Status	All ingredients of this product are listed or are excluded from listing on the U.S. Toxic Substances Control Act (TSCA) Chemical Substance Inventory.
Canada DSL Inventory Status	All ingredients of this product are listed or are excluded from listing on the Domestic Substances List (DSL), the Non-Domestic Substances List (NDSL) or exempt.
CERCLA/SARA Section 302	Not listed
SARA (311, 312) Hazard Class	Not listed
CERCLA/SARA Section 313	Not listed
California Prop 65	This product is not subject to the reporting requirements under California's Proposition 65.
WHMIS Hazard Classification	Not listed

Section 16

Other Information

Infinity Foils, Inc. provides the information contained herein in good faith. It is believed to be correct. However it is not all-inclusive and should be used only as a guide. Individuals receiving this information must exercise their independent judgement in determining its appropriateness for a particular purpose. Infinity Foils, Inc. shall not be held liable for any damage resulting from handling or from contact with this product. All information appearing herein is based upon data obtained from the manufacturer and/or recognized technical sources.

Abbreviations PEL Permissible Exposure Limit
TLV Threshold Limit Value

End Notes 1. SARA - Signed into law in 1986, the Superfund Amendments and Reauthorization Act (SARA) is an extension of CERCLA, and is intended to encourage and support local and state emergency planning efforts. SARA provides citizens and local governments with information about potential chemical hazards, and calls for facilities that store hazardous materials to provide officials and citizens with data on the type and amount on hand at specific locations. This field states whether a material is listed or not listed in section 372.65 of SARA. EHS - This states if a material is listed or not listed in Appendix B to part 355, the SARA Extremely Hazardous Substances (EHS) section. RQ is the reportable quantity. TPQ is the Threshold Planning Quantity.
2. RCRA - The Resource Conservation and Recovery Act enacted in 1976 and subsequently amended, controls solid-waste disposal and encourages recycling. This states whether a material is listed or not listed under this regulation. If listed the Hazardous Waste Number and waste characterization assigned by RCRA is also provided. 3. CERCLA - Enacted in 1980 and amended thereafter, the Comprehensive Environmental Response, Compensation, and Liability Act provides for identification and cleanup of hazardous materials released on land, into the air, waterways, and groundwater. It covers areas affected by newly released materials and older leaking or abandoned dump sites. This states whether a material is listed or not listed in CERCLA Table 302.4. If listed the section(s) that it is listed under and the Reportable Quantity (RQ) are also provided. 4. TSCA - The Toxic Substances Control Act controls the exposure to and use of raw industrial chemicals not subject to other laws. This states whether the chemical is listed or not listed under this regulation.
