

Tough Film

Product Data Sheet

Material Specifications

Thickness: .015" (.381mm)
Standard Size: 36" x 12" (914.4mm x 304.8mm)

Product Description and Key Features

This multi-purpose product can be used for several applications. Its most common use is for hot foil stamping large areas. Tough film is placed under epoxy glass board or phenolic board and provides a cushion against the hard board for a self-leveling effect. This technique also helps to minimize spot makeready. It can also be used for covering embossing or debossing pre-cast counters. The cushion effect works very well at maximizing the emboss/deboss detail and depth.

Recommended For

Embossing, debossing and hot foil stamping jobs

Storage

Dry, climate-controlled conditions
